

# Home Learning Ideas

## Summer 2

In Science this half term, we will be learning about plants. We will think about what plants need in order to survive and complete their life cycles.

In Geography, we will be learning about beaches and harbours. We will look at Poole Harbour and identify its features,

In Art, we will be learning to create sculptures using clay.

Home Learning is encouraged so that your child can share with you some of the knowledge and skills learnt in school as well as allow them to learn more and follow their own areas of interest. It can also help your child to become more involved in the learning and become more independent with their thinking. If you would like some ideas please use the list below, but these are merely suggestions, and it would be great to see what the children think of themselves.

We can't wait to see what the children produce this half term...

### Home Learning Ideas

- Plant some seeds and watch them grow! Create a plant diary to record the changes you see. Try putting some plants in different places, to investigate how their growth is affected.
- Create a flower sculpture using different materials. You could use Lego, stones in the garden, pasta shapes. Be as creative as you can with your materials.
- Make your own 'dragon machine', using junk modelling materials. Write a set of instructions for someone else to make one too.
- Visit the beach, a local coastline or Poole Harbour. Take photos of the features you spot. Can you compare the different places you visit?
- Create a map of a place you know well. This could be your house, garden, local park or another place you visit often. Try and add symbols and a key for the features of your chosen place.
- Make a painting or drawing in the style of Georgia O'Keeffe. Zoom into your chosen flower and use bright colours.
